C

Your On-Page SEO could be better

Your page has some level of On-Page SEO optimisation but could be improved further. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You should ensure that HTML Tag Content is completed correctly and align text content to target keywords.

Title Tag ✖

You have a title tag, but ideally it should be shortened to between 50 and 60 characters (including spaces).

Zahn- und Kieferzentrum, Zahnärzte, Kieferchirurgen, Parodontologen

Length : 67

Title tags are very important for search engines to correctly understand and categorise your content.

Meta Description Tag ✖

Your page appears to be missing a meta description tag.

A meta description is important for search engines to understand the content of your page, and is often shown as the description text blurb in search results.

SERP Snippet Preview *i*

This illustrates how your page may appear in Search Results. Note, this is intended as a guide and Search Engines are more frequently generating this content dynamically.

Usability

F

Your usability needs improvement

Your page has usability issues across devices. Usability is important to maximise your available audience and minimise user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

i

This check visually demonstrates how your page renders on different devices. It is important that your page is optimised for mobile and tablet experiences as today the majority of web traffic comes from these sources.

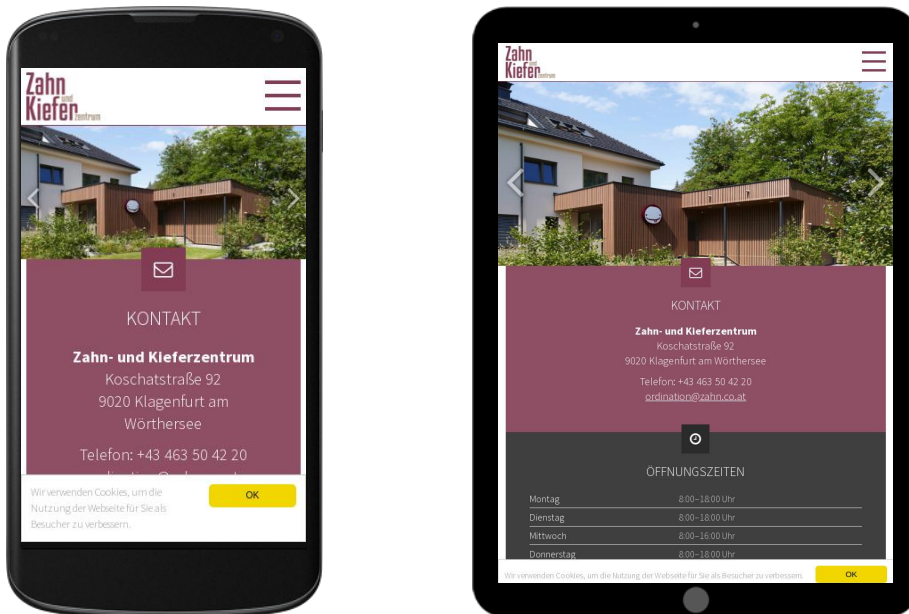

Google's Core Web Vitals

✖

Your page has failed Google's Core Web Vitals assessment.

Core Web Vitals are UI metrics created by Google that measure page experience and are becoming increasingly important as a ranking factor.

Use of Mobile Viewports

✔

Your page specifies a viewport matching the device's size, allowing it to render appropriately across devices.

Google's PageSpeed Insights - Mobile

✖

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localises to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

No Flash content has been identified on your page.

iFrames Used? ✖

Your page appears to be using iFrames.

iFrames are discouraged as they can complicate navigation of content in mobile and have historically been harder to index for search engines.

Favicon ✔

Your page has specified a favicon.

Email Privacy ❌

Email addresses have been found in plain text.

We recommend removing any plain text email addresses and replacing them with images or contact forms. Plain text email addresses can be susceptible to scrapers and email spammers.
